

## Mozilla Thunderbird Mail Setup

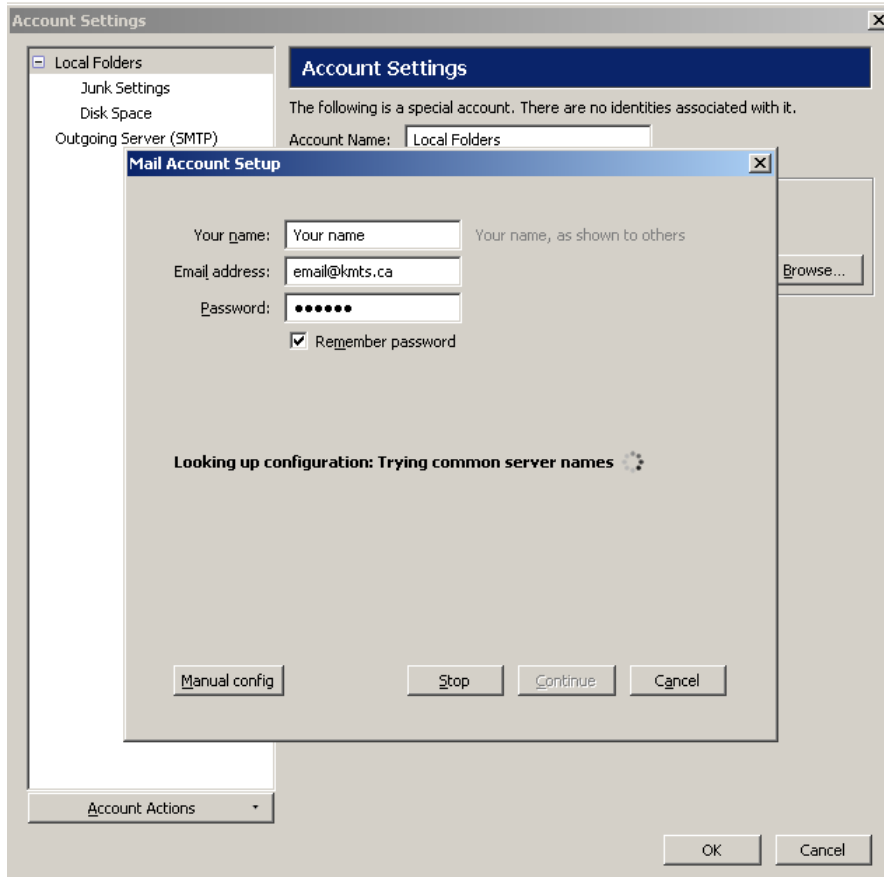

1. Open up Mozilla Thunderbird mail, click on **Tools** and then **Account Settings**.
2. A new box will pop up, click on **Account actions** and select **Add Mail Account**.

3. Enter your name, email address and password and click **Continue**.

4. On the next screen click **Manual config**.

5. Set Incoming to POP3, server hostname to **mail.kmts.ca**, and leave Port, SSL, Authentication at auto or auto detect.
6. Set Outgoing server hostname to **smtp.kmts.ca**, and leave Port, SSL, Authentication at auto or auto detect.
7. Make sure that the Username includes the @kmts.ca (eg. [email@kmts.ca](mailto:email@kmts.ca)). Click **Re-test**.

**Mail Account Setup**

Your name:  Your name, as shown to others

Email address:

Password:

Remember password

	Server hostname	Port	SSL	Authentication
Incoming:	POP3	mail.kmts.ca	Auto	Autodetect
Outgoing:	SMTP	smtp.kmts.ca	Auto	Autodetect
Username:	email@kmts.ca			

8. Settings should now look like this, make sure Incoming Port is **110** and Outgoing port is **25**.

**Mail Account Setup**

Your name:  Your name, as shown to others

Email address:

Password:

Remember password

The following settings were found by probing the given server

	Server hostname	Port	SSL	Authentication
Incoming:	POP3	mail.kmts.ca	110	None
Outgoing:	SMTP	smtp.kmts.ca	25	None
Username:	email@kmts.ca			

9. Click on **Create Account**.
10. You may get a warning screen so just Check the "I understand the risks" box and click on **Create account**.

You're Done !
